

COVID-19 Personal Protective Equipment by Respiratory Protection Type

N95 Respirator Required

Any team member participating in the care of patients who are positive for COVID-19 or patients under investigation (PUI) for COVID-19 that are having aerosol-generating procedures or other procedures of concern must wear an **N95 respirator, eye protection, gown and gloves.**

Examples: nebulizer therapy and aerosol-generating procedures on ALL dental patients.

Isolation Mask Required

Any team member participating in the care of patients who are positive for COVID-19 or PUI for COVID-19 that are non-critically-ill or with patients with respiratory symptoms where diagnosis not established, must wear **isolation mask, eye protection, gown and gloves (PPE).** Dental team members should wear isolation mask, eye protection, and gloves with ALL dental patients.

Examples: COVID-19 testing site, Dental Urgent Care and Medical Urgent Care.

Isolation Mask Recommended

Any team member interacting with patients who are negative for COVID-19 or not a PUI, or any team member with significant public interaction are encouraged to wear **isolation mask and gloves** (only if possible exposure to body fluid).

Examples: Outpatient Services, Clinics, Patient Access, Behavioral Health, Imaging, Lab Departments.

*Pediatrics care – all team members providing pediatric care **in any department** should wear isolation mask, eye protection, and gloves with ALL pediatric patients.

No PPE Recommended

Any team member not interacting with patients or with limited public interactions are not required to wear masks. Wear gloves only if there's possible exposure to body fluids.

Examples: Office-based worker with no patient contact and minimal public interactions
