

# How To Review the DRVS PVP Weekly Dashboard

The PVP Weekly Dashboard looks at Point of Care Closure alerts from the PVP worksheet and identifies missed opportunities and alert closure success rates.

The report is emailed weekly to the Rendering provider, site manager, and RN Case Manager, however it can be accessed anytime through DRVS. The data updates each night between 11:30a-2a.

## How to generate the PVP Weekly Dashboard in DRVS

1. Log into DRVS <https://app.azarahealthcare.com/>
2. Select the **Dashboard** icon & select **Custom**

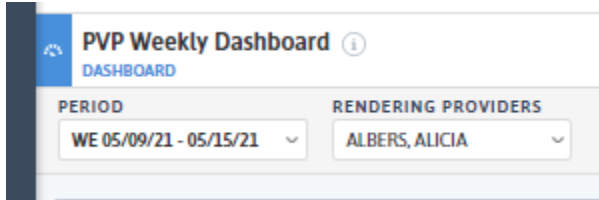

3. Select the **PVP Weekly Dashboard** from the dropdown list

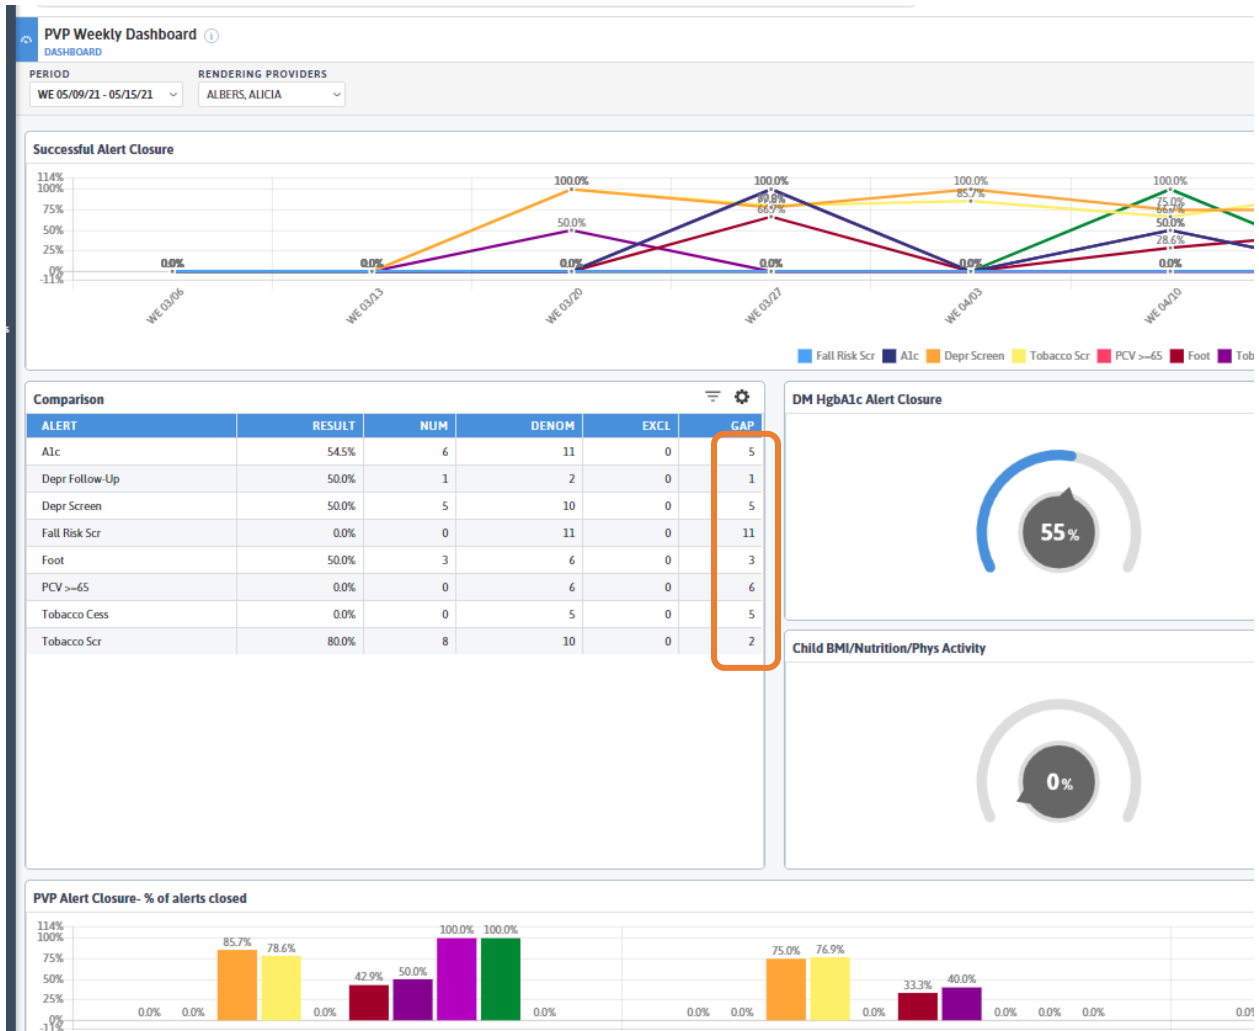

# How To Review the DRVS PVP Weekly Dashboard

- In the top left corner of the report, select the period that you'd like to view & the rendering provider.

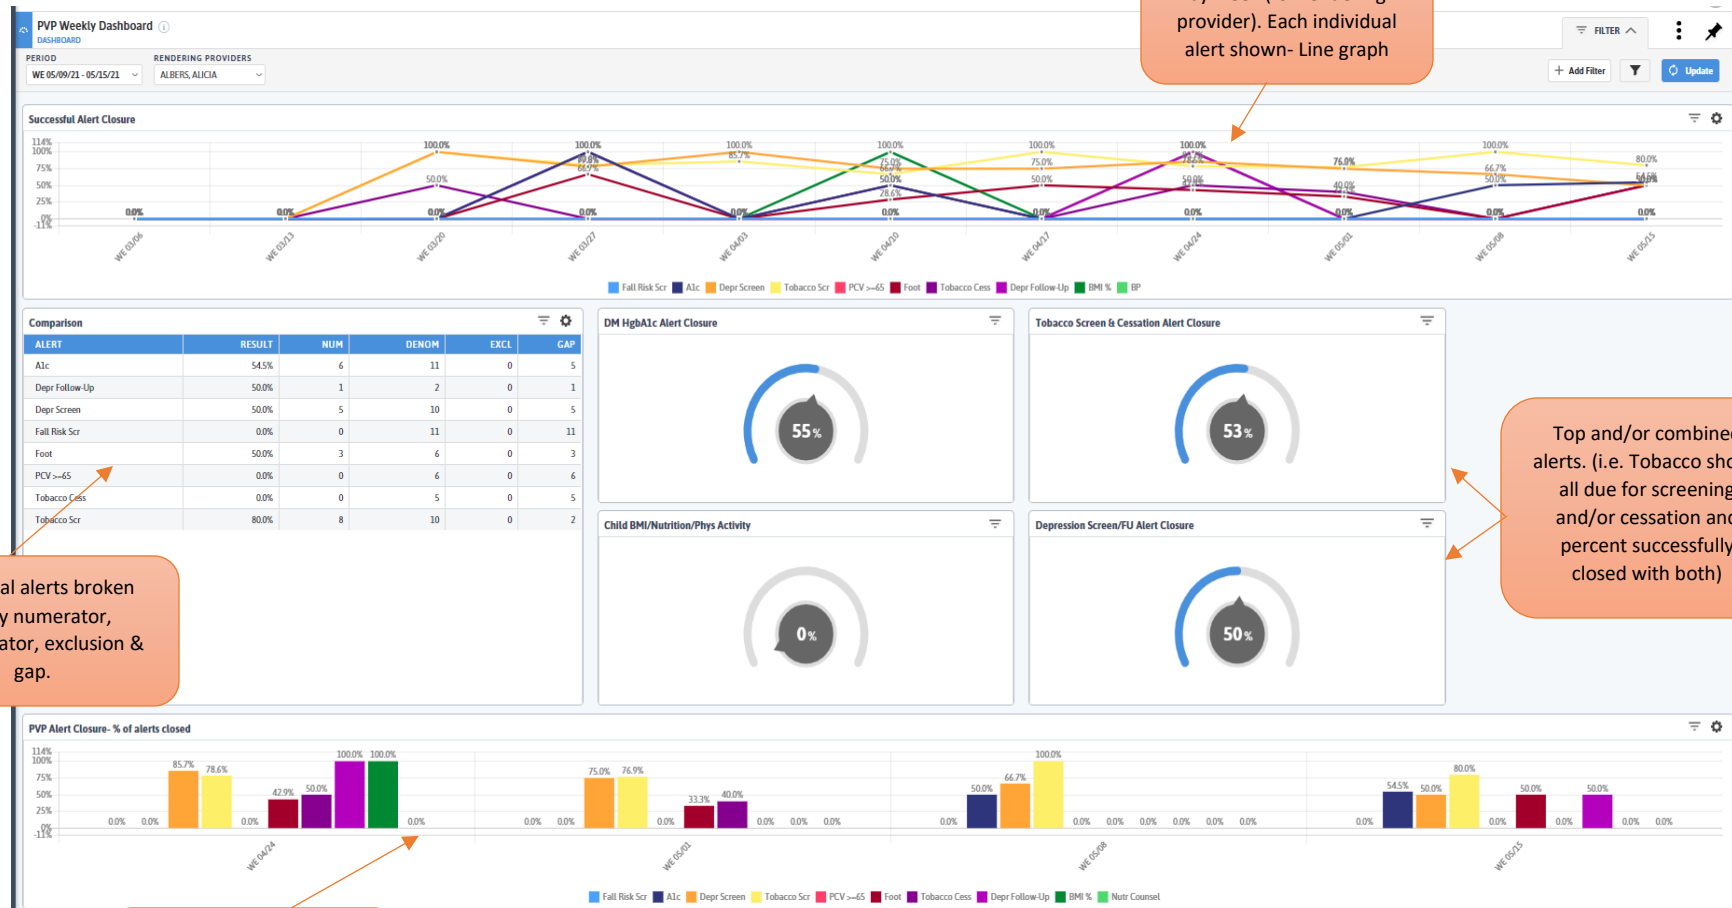

- Select **Update** to run the new fields
- When the report updates, you can select the numerical value next to any of the *gaps* to generate a list of all missed opportunities for all alerts.
  - i.e. if you select the gap for tobacco scr. It will generate a list of not only the missed tobacco screen but all point of care alert closures missed

# How To Review the DRVS PVP Weekly Dashboard

Reading the PVP Weekly Dashboard:

Successfully closed alerts by week (for rendering provider). Each individual alert shown- Line graph

Individual alerts broken out by numerator, denominator, exclusion & gap.

Top and/or combined alerts. (i.e. Tobacco shows all due for screening and/or cessation and percent successfully closed with both)

Successfully closed alerts by week (for rendering provider). Each individual alert shown- Bar graph
