

HOW TO Document Allergy Injections

AFTER, you have ordered your allergy injection in **Therapeutic Injections** you will document your injection as followed.

Open up **Procedures** under the **Plan** portion of the progress note, and select “Allergy Injection”

Choose your vial you are administering (If you are only giving one injection, it would be Vial 1 you select). Once you select your vial, it will look like this. Please note that all these questions are required to be answered.

You will document the same for each additional vial you are administering.
